

## ESSAY

Time Allowed: 3 hrs.

Max. Marks: 250

### Instructions to Candidate

- Both sections are compulsory.
- Attempt an essay from each section.
- Each essay carries 125 marks.
- Write each essay in about 1000-1200 words.
- After finishing the first essay, attempt the next on a fresh Page.
- Any page left blank in the answer-book must be crossed out clearly.

(Examiner will pay special attention to the candidate's grasp of his/her material, its relevance to the subject chosen, and to his/her ability to think constructively and to present his/her ideas concisely, logically and effectively).

Essay 1

Essay 2

Pl- see inside

Rather than writing more, right relevant things that address the requirements of the theme.

Don't write "free hand".  
Before proceeding understand the title, the background.  
Break it in several components and dimensions thereafter discuss and analyse.

SECTION - A

1. Everyone's worried about stopping terrorism; well, there's really an easy way: Stop participating in it.
2. Plagiarism is self sabotage process.
3. The world is witnessing a large scale crisis of media credibility today
4. Sustainability is about ecology, economy and equity.

SECTION - B

1. 'The world belongs to man' OR 'man belongs to the world.'
2. The alternative to bad religion is not secularism, but a better religion.
3. When one has to think, why not think big
4. Education is not preparation for life; education is life itself.

Section - A

1. Everyone worried about stopping terrorism; well, there is really an easy way: stop participating in it.

"Talk" (Development) and Terror can not go together"

— Prime Minister  
Narendra Modi

In the history of world, there have been different stages of development, taken place that may be era of industrial

Revolution in western countries, era of Renaissance and enlightenment, establishment of democratic

Principles in U.S.A. by American Revolution,

Idea of liberty, equality and fraternity by

French Revolution. After these in the beginning and mid of 20th century world

faced two world wars World War I

and World War II which ended after

Nuclear Attack on Japan's Nagasaki and

Hiroshima.

During this long process of world development many parts of world faced rapid and proper development that may be western countries and

Some part not like Asia and Africa.

Mostly Asian & African countries in past

were the colonies of British and other European

Countries. Most of British Companies who had

base right in countries of Asia and Africa.

They exploited the people of these countries.

Backward is too long, you should really startway come on intro and give an out line of the topic.

Remarks.

There was no proper development of education, health and food resources of these countries by Britishers and other European countries. Every one wants development of his country and his community and his family.

There is increasing demand for freedom from these companies and increase in antagonism against these foreign rulers in every country of Asia & Africa. It was fight of native population. They started agitating against these foreign companies. They called Terrorist and Terrorism developed in this manner. Now Terrorism become a global threat. In India's freedom struggle our revolutionaries who participated in our freedom movement were called Terrorist. After independence this problem is not solved properly and India now days become a big victim of Terrorism.

Remarks

Now a days Terrorism has become a Global Threat. There is also many problems like climate change, food security, water scarcity, and Terrorism. ~~etc~~ Every part of world is facing terrorism in <sup>variety of</sup> ~~any~~ form. what are the factors that leads to development of Terrorism is main question and Nations have to search ~~or~~ proper answer for this. what things gave birth to terrorist and what circumstances lead to become a Terrorist. These are the questions many security analyst searching for.

Every one on this planet earth wants peace and development of human being ~~no~~ no one wants threat and insecurity. African and Asian countries were the colonies of western countries. everyone in country wants that utilisation of his countries natural resources for his own country first.

Remarks

~~From~~ Firstly development of this own country  
 and then proper economy should be  
 developed by exporting and importing of  
 surplus. Western countries companies  
 exploited these countries people and  
 no proper development of health education  
 was ~~not~~ done by companies, ~~representing~~  
 of rights for development and against  
 exploitation lead to violence by natives  
 people and foreign countries. These  
 companies demanding ~~the~~ their rights  
 people and companies took very ~~of~~ repressive  
 action against these people and called  
 them terrorist.

Now a days terrorism become big problem  
 for world community. There is not single

Country of world which is not affected by  
 terrorism

This is  
 a relevant  
 part.  
 you can  
 explain  
 in one  
 or two  
 paras  
 what are  
 the main  
 causes of  
 terrorism  
 and how  
 participation  
 in  
 terrorism

is one Remarks  
 of the main  
 states, institutions  
 all participate  
 due to individuals  
 fundamentalism,  
 hegemony and dominance  
 and control of resources  
 and markets.  
 The channels of partici-  
 pation includes -  
 (a) Recruitment (b) Support  
 ideological and financial  
 (c) Hate campaigns and  
 mobilisation  
 (d) Exploitation of  
 subjugation

Before this terrorism was only related to Country specific and some western countries called this a law and order problem but when this related to western countries it called global threat.

Now Terrorism is exists in two forms good terrorism and bad terrorism. every Country defined as per his choice what is good and what is bad. There is no form of terrorism exist it is only terrorism.

*This is close to the central theme!*

Various organisation developed on philanthropic basis like Al-Qaeda which was philanthropic organisation in Saudi Arabia and in western

Countries and later become terrorist organisation

Now, ISIS (Islamic state of Iraq and Syria) which is terrorist organisation, originated in central Asia and spreading other parts of world and attracting most of youth towards it and spreading on the basis of religious thoughts.

Remarks

Terrorism have taken a Religious shape and Religion. Specific and Called. Islamic Terrorism by various analyst of Security.

How to stop Participating in Terrorism

Youth of every country is very productive asset of a country. Youth have very huge potential to transform the shape of countries economy. It depends upon us how to utilize this huge potential asset by giving skill or by giving weapons.

Youth stage is very prone to sentiments and emotional feelings. Every nation should take responsibility to provide good education and technical skills to youth by which nation and society can be benefited by these developmental and innovations.

Remarks

ISIS have origin in central Asia and spreading throughout the world. ISIS have used to radicalise the youth that have become religion specific. He used the IT technology and used the cyber space to reach out the youth. Many educated youth joined the ISIS across the world and by online radicalisation of youth. Islamic grounds is basis for ISIS spreading among the Islamic youth. His model is based on "Khursan model" which mean youth is fighting for save of religion mean "fight before Rajamat". It is the responsibility of Islamic religious preachers to stop this.

Governments of Nations should take neutral way for development of Education, Health and Infrastructure. Governments and world leaders of various nations should take responsibility of every part of their country should be properly developed.

Remarks

## India & Terrorism

When Britishers ruled India about 200 yrs. and our forefathers fought for our freedom struggle. In the period of national movement various stages occurred and Britishers tried to demolish the potential of our forefathers but failed and who was fighting for national movement called Revolutionary Terrorist.

After the independence, partition ~~took~~ took place and as per two nation theory there was a country called Pakistan become a part of world map. As per consequences of partition state of Jammu and Kashmir became matter of discontent between two nations. From the independence and till now India & Pakistan have faced war several times and still

Remarks

Military is going on in state of Jammu and Kashmir. Pakistan has become the synonym of Terrorism.

When India started the ~~pro~~ facing of Problem of Terrorism these western countries called it Problem of Law and order and when these countries started facing the Problem of Terrorism, they called it a global threat. They defined it in terms of good terrorism and bad terrorism. Now a days Pakistan has become the hub of various terrorist organisations which are spreading terrorism across the world.

In 1996, India proposed a Comprehensive Convention on International Terrorism (CCIT) in United Nations General Assembly. by CCIT every country have to define their policies as CCIT against Terrorism and have to fix responsibilities.

Remarks

India is struggling for passage and adoption of ECIT at international level.

The state of Jammu & Kashmir, rise of non-state actors have become challenge for government.

These non-state actors have origin and supported by neighbouring countries.

There is need to reach the youth of state of Jammu & Kashmir by proper development of health and education infrastructure should be done.

Birth of terrorism took place when local antagonism become main factor against government. Government should take initiative

to reachout to the youth of their nation. Proper development of every section of society should be done properly without partiality. World belongs to all everyone has to learn this thing.

Remarks

The role of Non-State actors took place. They did not fulfill their demands by democratic means. Mechanism should be developed like that every one part of that mechanism.

By linking the terrorism to some particular religion is not good for society because violence have no religion by violence we can kill each other only but by getting together and adding all brains to solve a problem, then problem can be solved easily. development of every one is development of humanity.

57  
-----  
125

① The issue of participation in terrorism involves directly and indirectly individuals, institutions and states through ideology, religious fundamentalism, financing and recruitment for hegemony or otherwise. This is the core from which you have deviated.

③ Stopping participation would take the steam away from terrorism.

② But curbing terrorism does need only stopping participation which is direct. Failure of state in protecting the interest of weaker sections and delivery of welfare and violation with corruption and violation of human rights through police and defense forces are also aken to participation.

Remarks  
(A) However, deterrence, punishment, transparency and accountability, trust building etc. can also help in curbing terrorism.

## Section - B

"Education is not preparation for life, Education is life itself"

Education is a thin line which differentiates man and animal.

When a ~~person~~ <sup>child</sup> born it happened mostly that family members decide that he may become engineer, doctor, lawyer or scientist in future but no one knows what he will be. Life is a long process of various stages. Every one is educated in either form of life. Education is learning about something and learning the new things which affects his life and character and others life as well as others thinking towards the society.

In ancient time, there was different form of education occurred than now-a-days. Ancient time education was related to

Remarks

Learning of various weapons by King of  
 State and their Prince. People in ancient  
 era learn about how to fight with  
 swords and bow, etc. Previously education  
 was related to varna specific in society.  
 It was good, they thought education did not  
 be gender specific. Women from every  
 sections of society participated in learning  
 process. They participated in war also.  
 They learn about how to fight in a  
 war.

But in medieval era learning become  
 to mostly religion specific and women  
 have less participation in education.

Modern era have changed entire learning  
 have changed aspect of life. Easy access  
 of knowledge through internet and  
 learning through social media have  
 become child game.

Remarks

These education techniques preparing human being to challenge the ~~possibilities~~ difficulties faced by human being.

There are various forms of education ~~occurs~~ if we saw the history of education, there are different stages which occurred in a previous time. at time of Maheshwari, and Ramayana and Ancient India mostly. Indian society was divided on varna basis. Brahmin, Kshatriya, ~~vaiya~~ vaishya and Shudra. Education was related varna specific and Brahmin who have the knowledge of Religion and Philosophy. They mostly learned about Religion and no-one others. Kshatriya's whose responsibility to protect the kingdom took the education of weapons.

Remarks Background description is overreaching while the main theme has lost connect.

Vaisyas who were mostly Carpenters, and mostly trades. They learn about trading related knowledge. Brahmins' main responsibility to give education. In Ancient times women also participated in every aspect of education efficiently and promote gender equality in Ancient times. Till the age of 25 yrs student lived the life of an ascetic and serve his teachers. They were prepared for to face any difficulty in life.

In Medieval era of history education became mostly religion specific. Women were not participated in educational forums. and limited number of people participated in educational institutions. Education was only related to religious texts. Religious text was learned by kings and as per these text kings did justice and rule their kingdom.

Remarks

In the present era of Industrialisation and  
 Machines, education forms have been changed  
 because people think logically and every  
 aspect of reasoning. Today's education  
 forms have been changing rapidly and  
 evolution of education changed from one  
 form to others every rapidly.

Now a days education exists in form  
 books of various field like Medical,  
 engineering, Information and Communication  
 Technology, Law, Humanities, Philosophy,  
 etc.

Today's education became the factor of  
 Revolution among masses. A learned  
 or educated person has demand every  
 where. If we see the field of life  
 process of living being various fields of  
 science working on it.

Remarks .

Study of Plants there is a separate branch called ~~zoology~~ Botany and animals zoology.

For Human being there is different branches anatomy by which every part of Human being studied, deeply and by this many life taken disease can be reduced.

For engineering and IET (Information and Communication Technology) there are different forms of Engineering, like Civil engineering or ~~mech~~ for making construction of Roads, buildings by logical studies and earthquake

Prone studies to make buildings have done by engineers, natural disasters can be made less disastrous by using Technology.

Mechanical engineering to make large machines and rapid increase in production of materials to satisfy the needs of people.

Remarks

Development in electronics have changed era of Technology. Life Development of Robots and UAVs have made human life simpler.

Biotechnology by which genome editing can be done. By editing genes of Human beings life characteristics can be changed. by introduction of Biotechnology in field of Agriculture, genome editing and development of seeds which are less prone to various insects and risk of crop failure is reduced. In a world is Now a days facing the problem of water scarcity and drought. Drought variety of various crops is developed that needs less water and Nutrient rich. Production is increasing day by day.

Remarks

by Invention and development of internet Technology, Information and Communication Technology and Space Technology. Era of Education: witnessed a different and important stage. ~~to~~ everyone can access the knowledge about anything which we want easily and standard based education can be achieved.

There are various ~~librarians~~ <sup>online</sup> libraries and online ~~forums~~ <sup>forums</sup> which learn the people by online mode. Education can get easily access.

By using space technology man today can learn about various planets and evolution of universe and incidents which are happening in universe and their impact on planet earth. Impact can be reduced by remote sensing technology weather forecasting can be done for benefit of our farmers.

Remarks

Education = is learning about something and  
 by learning something developing new things  
 Education is gaining knowledge about some  
 things utilising these knowledge to ~~use~~ <sup>and</sup> develop the  
 new things. These two statements are  
 related to each other. |

Education is learning and learning new  
 things in life long process and we can  
 can say life itself. There is no age  
 bar for learning. If some one is learning  
 how to use computer at the age of 70<sup>is</sup>  
 he is gaining knowledge and enhancing his  
 ability to do work on computer. at  
 early stage getting knowledge or learning  
 is starting the journey for life that  
 how to learn in further stage.  
 Learning can not be restricted to some  
 point of time.

Remarks

If a person is constant at one point he may be fool but a persons life is continuous and never ended for learning. Every one wants that his life must be happy how to be happy learn new things and utilize these skills to make happy his life. Learning knowledge is about developments which are going on in the life. If we satisfy that we have learned something and stoped learning it may be false learning one thing have set the stage for new things learning can never ended it is life long process. evolution is natural process. New things evolved day by day. New technologies in every aspect of life emerging and it never ended. it is required that everyone should gain knowledge further and further. evolution of life is natural process and education is part of life.

lost the way what you have written is conclusion is relevant but description has not addressed the main issues in next page

Remarks

PTO

your write up has missed the connect with the theme. you needed to explain, analyse and discuss following points —

(i) Education is preparation of life in what sense?

- Accordingly
- (a) Skill
  - (b) Awareness and information
  - (c) Knowledge and wisdom
  - (d) livelihood opportunities and career

(ii) Is it only about preparing for life — and once prepared for life (as above mentioned) should stop?

No —

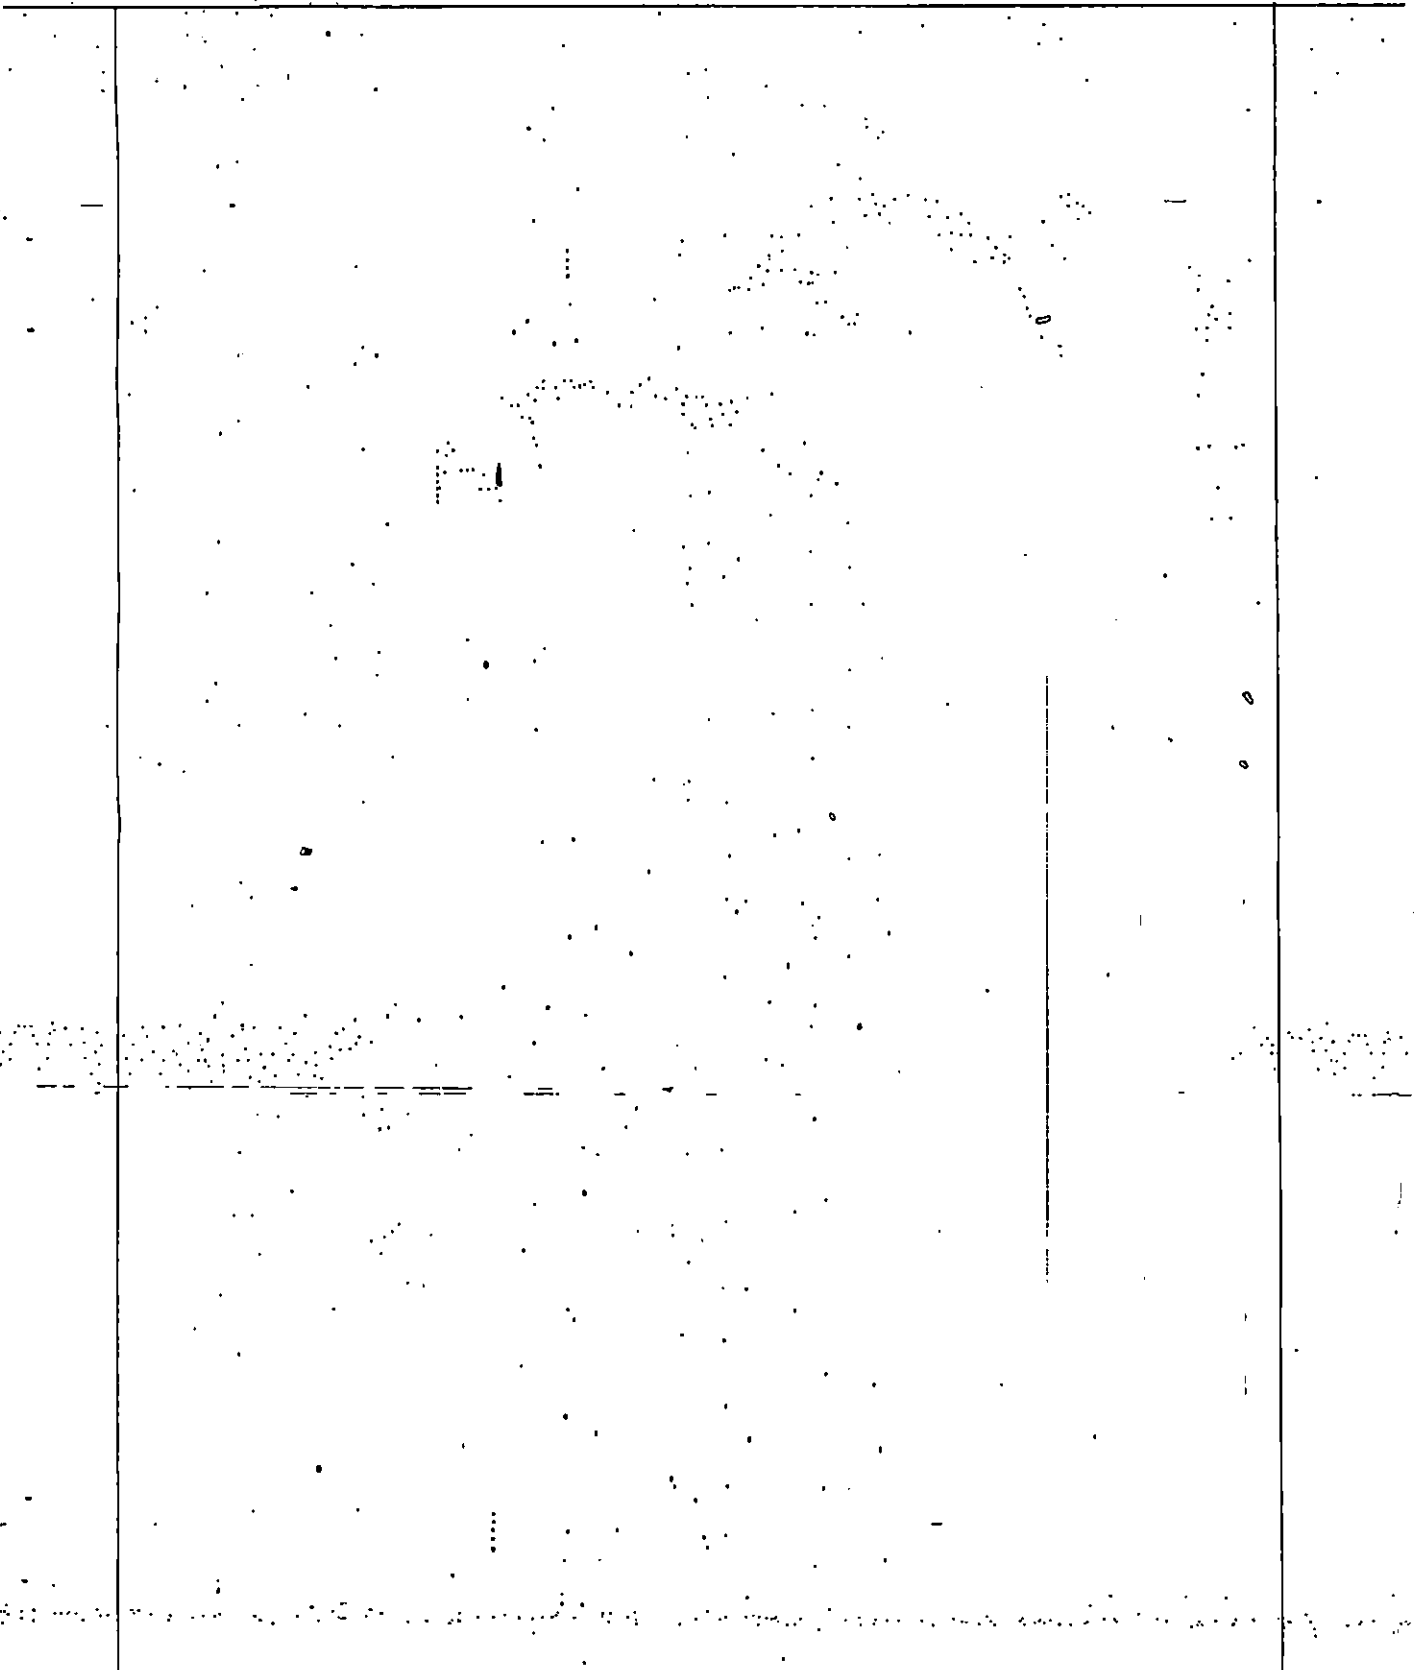

Life itself is a school. From each success and failure, hope and disappointment we learn. Every experience is a teacher. A friend is a teacher, an enemy is a teacher, every event and phenomena of life act as a teacher if we keep our eyes open.

(iii) yes there are formal channels of education which prepare us for life. But after completing the formal channel the world and life opens the phase of informal and real learning. And this learning is

Remarks

continues till we breath last. So education is not learning preparing for life but it is life itself.
