

GS SCORE

BATCH - II
TEST - 1

Roll No. 9022800

ESSAY

Time Allowed: 3 hrs.

Max. Marks: 250

Instructions to Candidate

- Both sections are compulsory.
- Attempt one essay from each section.
- Each essay carries 125 marks.
- Write each essay in about 1000-1200 words.
- After finishing the first essay, attempt the next on a fresh Page.
- Any page left blank in the answer-book must be crossed out clearly.

(Examiner will pay special attention to the candidate's grasp of his/her material, its relevance to the subject chosen, and to his/her ability to think constructively and to present his/her ideas concisely, logically and effectively).

Name Prince Kumari

[Empty box for Remarks]

~~SECRET~~

SECTION - A

1. Many men go fishing all of their lives without knowing that it is not fish they are after.
2. The material world is simply an expression of the mind.
3. The higher we are placed, the more humbly we should walk.
4. Sports and Competition do not build character; they reveal it.

SECTION - B

1. Consumerism kills culture with overproduction and heightened sense of need, established by the marketing.
2. In the era of post truth fact depends entirely on the power of man who can fabricate it.
3. People 'over-produce' pollution because they are not paying for the costs of dealing with it.
4. There are not enough jails, not enough police, not enough courts to enforce a law not supported by the people.

4) Shows to Competition do not
~~show~~ reveal character, they reveal it.

Recently in Pune, a race was conducted. There were 5 competitors, during the race a person fell down. Then rest of the players stopped, went back, made him stand up and continued again.

The race was among mentally challenged children, that scene gave a new dimension to sports and competition in which cooperation, humanity went ahead with competition.

In every where

Introduction
 could have been better.

Remarks

- Sports do build character like
- Leadership qualities
- Ability to tolerate
- Time management
- Discipline

of life we see sports & competition do not build character rather it reveals the character of performer. Competition is not limited to sports rather it encompasses every sphere of human life from childhood to old age, even among races, nations.

In some examination, a child may be seen cheating whereas another may see it as against purpose of examination. Like Gandhi in childhood accepted to his teacher that he has not done those Maths problems for

Remarks

which he was getting praised.

Similarly in family, competition between boy and girl often leads to subjugation of girl enforcing patriarchy. It reveals character lacking in compassion, inclusiveness in boy & family.

Even in society, ethics of people determines their co-ordination & competition. A famous tale goes like, once I had asked a person to wish for anything but he will give double of that to their neighbour. Person then asked to destroy his one eye. However, several stories like after Gujarat riots, A Hindu

out of
Context
always
Stick to
the topic

Remarks

from Goa invited a Muslim family from Gujarat, a Muslim of riots for dinner. This shows it is more about ethics of a person, family, society that determines their competition & coordination.

Similarly in sports, on the one hand we see aggression of Viret Kohli and on the other hand calmness of Sachin Tendulkar. Both playing the same sport but completely different character reflects in sports.

Issues such as battling & indulgence of players in

them for ~~the~~ incentive like money shows complete contrast to Major Dhyanchand's reply to father when he asked Major to play for ~~Germany's~~ team.

Some players look for winning & as ultimate motive of sports like issues of dungs taking whereas for some it is respect for sports that matter like once ~~Adam~~ Aubrey Choulet returned to position even before 3rd umpire decision when ball got slight smack to his bat and caught by keeper.

Remarks

PV Sindhia's spirit of 'Not giving up' reflected in Rio Olympics recently even while fighting against World Championship. So, it is more about ethics and character of person that reflects in sports. It's not only sports but other competitions too like Economic, Political, at international level too.

Like in economic sphere some companies do adulterary, fraud with customers as well as shareholders like Sahara scam / Sanadha scam. Whereas others build public

Trust, people to people relations
like Tata Group is known for.

Even at international level,

China's policy of exploitation of
other countries in name of

investment like in Sri Lanka China
increased debt burden on them during

post investment, in Africa rather

than providing employment of

neighbours, they bring nearly $\frac{1}{3}$

labour from China and maximum

Resource exploitation. Whereas

India's record of focusing

socio-economic development of

natives by building schools

hospitals, pharmacies is regarded.

Remarks

Thus it is more about values rather than competition in itself.

It is not limited to economic sphere only but political sphere too. Like, difference

in approach of Gandhi, Revolutionaries

while competing with Britishers for freedom.

Today defection is very

common among politicians like

recently Jayant for money, position

But once Dr. Ambedkar resigned

from Nehru's cabinet on the

basis of ideology. So competition

does not build character rather

it reveals it.

Even at competition among
global players for economic development
leading to different approaches
due to values of nation like
India's mission for 175 Gto by 2020,
ISA in view of environmental
cost of development depend on
fossil fuel vulnerability of world
due to climate change. Whereas others
many countries like US which
are major contributors of green
house emissions are reverting
back to take responsibility like
seen in giving no importance
to Paris deal. Bhutan's example
of sustainable environment &
development reveals its environment

Remarks

contrast character.

China's aggression in South China sea region, Doklam region also show its character of lack of values like 'Universal Brotherhood, Peace & respect for Harmony.

Similarity at international forum, developed countries pursuing their interests at WTO by opening economy of developing & less developed countries which will crumble under burden of impacts also reflects our notion towards cloning of world in event of competition.

Remarks

As we have seen it is
character of person/ ^{that} society/ nation
reveals in events of: competition
rather but not that character
is built during sports &
competition. Otherwise today
we won't need 'shock code'
for players, corporate governance
laws for businessmen, institutions
during examination, Anti-defection
law in politics, fasts deal
for environment, inter-national
laws for maintaining peace.
Peace & harmony would have
shrined in the family, society,
nation and world.

Character
 could be
 negative
 as well.
 So competition
 and sports
 might build
 character.

Remarks

In your essay you have given several
 examples but whole essay can't be
 based just on examples. It should
 be complemented with proper content
 & dimensions.
 Check Hints for other dimensions.

Section - B

3) People overproduce pollution because they are not paying for the cost of dealing with it

A person walking on the road throw a wrapper on the road. Some one interrupted him and said, "Nation is moving towards ^{Swachh} Bharat. What are you doing?". The person simply said, "It is not my responsibility but Municipality's. Such Attitude of not owning their own pollution is major factor in making our

Introduction could have been better
Beginning of essay should have effective communication.

Remarks

environment pollution sudden,
 because it's ~~always~~ responsibility
 of someone's to deal with it.

It all starts from ~~an~~ an ~~own~~
family itself. Boys 'over produce'
 pollution, waste because it is
 responsibility of their ~~steps~~
 or mothers to clean up the
 house. In many cases we put
 our waste outside our house
 and ~~take~~ ~~end~~ of responsibility
 & cost of dealing with it.

Our water tanks usually
 overflow and water is getting
 wasted and ground water table
 is falling but we don't care
 since we never think falling

Remarks

unavoidable is due to our actions
 Now we gotta pay for its
 recharge.

It is not limited to our
 house rather it spreads and
 touches every other person and
 profession.

Like Farmer uses excessive
 pesticides, fertilisers to increase
 farm output. They are going
 to receive value for their
 produce but not paying
 environmental pollution affecting
 water quality, ocean life
 due to Eutrophication. During
 animal husbandary, unless city

production affecting global temperature.
 we causing vulnerability to
 oceanic countries but often
 we look only at production
 and value addition of produce.
 Farmers stubble burning in
 region surrounding national capital
 causing air pollution
 due to particulate matter.

Similarly industrialists

affecting environment like
 flowing of wastewater into
 rivers, lakes, air pollution
 due to burning of fossil fuels, radiation
 of telecom companies, activities
 such as coal mining & others

You should
 have given
 more
 emphasis
 on industries
 and should
 have discussed
 it before
 farmer

Remarks

minerals mining, ~~causing~~ whether it is government that is paying via various ~~rehabilitation~~ plans, waste water treatment plants or people by ~~beating~~ worse quality water, high amount of arsenic in Eastern regions, poor quality of air ~~causing~~ diseases such as ~~pneumonia~~ or birds affected by ~~reditions~~ ~~and~~ various ~~communities~~ are paying for the pollution created by industrialists this 'over-production' ~~polluting~~.

Similarly in Transportation industry, various vehicles running on road without pollution checks because they don't consider

Remarks

air pollution as liability but
 pollution checks. Police cannot
 off. the Engine in Traffic because
they are not paying cost to
Environment pollution

We have seen from family
 to society various stakeholders are
 indulging in over-produce pollution
 because not paying for costs, but
 it is not accepted here & rather
 even at international level same
principle works.

Before various conventions,
 developed countries are over-
 producing and putting their
 waste i.e. chemical, biological, Nuclear

Remarks

in vicinity of developing countries
like U.S dumping waste near
Haiti. Also developed countries
now want ~~developing~~ to share
equal burden towards tackling
environmental challenge, it
shows same trend of low
of responsibility & paying cost.

We have to understand
that this pollution is not
just about environmental but
touches other dimensions of life
also.

like politicians pollute
minds of people by encouraging
caste, religion, linguistic divisions

to further their own ends,
it finally leads to violence,
hatred but they are not going
to lay for it.

Similar trend was led
seen since ancient times, like
Brahmanes & Kshatriyas to further
their dominance over society
led to subjugation of ^{so-called} lower
castes.

Various firms halling
minds of people by showing
seeds of greed & promising
high returns that becomes
basis of Chit fund scams like
Rice valley scam, Sarnadha scam.

Remarks

Firm's reap profit & cost is
 payed by investor.

However to say that polluter
 people are not paying cost
 for dealing with it would
 not be completely true.

Like a family is paying
 in form of lack of sanitation
 nearby house thus causing
 various diseases like diarrhoea
 affecting cognitive development of
 children.

Farmers are paying
 in the form of rising vulnerabilities
 due to climate change, decreasing
 ground water level, increasing

Remarks

instances of crop failure.

Finally we all are
 living together thus any
 environmental, ~~social~~, economic
 pollution will affect all
 of us collectively. Thus
 it is not that people
 'over-produce' because pollution
 because they are not paying
 just the cost of dealing
 with it. Rather it is people
 'over-produce' because they
 are unknowingly paying cost
 of dealing with it.

This we all need

Don't
 underline
 every
 thing

Remarks

to understand 'flight of commons'
 and our responsibilities
 towards ensuring healthy environment,
 primarily among all, whether
 it is law of nature, our
 constitutional values like
 social justice in Preamble,
 fundamental duty all citizens
 towards healthy pollution free
 environments
