Roll No. _____

Mobile No. _____

Date 25th August, 2017Signature Devi

REMARKS

- Q1. High logistics cost is one of the major reasons for uncompetitive of Indian goods in global markets. In this reference discuss the significance of having multimodal logistic approach in India. What are challenges in present logistics sectors? Also discuss some of the major trans-boundary multimodal projects of India. (12.5 Marks)

Significance of Multimodal logistics approach

- Multimodal logistics approach will ensure
- Seamless transboundary movement of goods.
- Checking, clearance at borders Posts will be done
- in a timely and quick manner.
- This will reduce the transportation cost and
- make products globally competitive
- Multimodal logistics will enhance trade
- & investments in the region, and will also
- generate employment.

Challenges in present logistic sectors

- WB report on ease of doing business has said that
- Indian logistics is not modernized
- There is no proper system to track the shipment

Remarks of goods

→ Problems of red-tapism, delay on clearance & checking at borders

→ International movement of goods face problem of frequent uploading & downloading

Major Trans-boundary Multimodal

Projects in India

① BBIN

Bangladesh - Bhutan, India Nepal Motor vehicle agreement to ease the transboundary movement of goods

② INSTC,

Motor Vehicle agreement with Myanmar
Thailand is also in progress.

③ Bangladesh - India border check posts

to facilitate trade & investment.

4

→ more freight movement via inland waterways

↳ most cost effective

→ Role of GST in this context

INSTC

Remarks

- Q2. What do you understand by the term Industries 4.0? How it is going to impact the employment generation in India? What possible steps can be taken to avoid any adverse effects on employment generation from Industries 4.0? (12.5 Marks)

Industries 4.0 refers to Fourth Industrial Revolution. i.e. a high level of automation by using robotics, Artificial intelligence, big data, cloud computing etc.

use for
data exchange

Industries 4.0 & its impact on employment generation

Good Impact

- ① This will generate highly skilled jobs to operate machines, computers and modern equipments
- ② Scope for job generation in diverse fields - decision making, operating computers etc

Bad Impact

- ① Automation will lead to loss of jobs for unskilled laborers / workers
- ② Workers / manual jobs can be replaced with assembly lines, robots
- ③ Threat to SMEs
Informal sector, as they can't compete with technologically advanced industries
- ④ May lead to jobless growth & consequent social unrest & demand for reservation in government employment
- ⑤ Threat to demographic dividend

Remarks

~~Steps to avoid adverse impact~~

① Skill development

Focus on skill development, as per modern skill needs of industries. More focus on creating skills in technological fields.

② Promotion of entrepreneurship / self-employment

Promotion of innovative start-ups

③ Employment

Academic-industrial collaboration

To bridge skill gap & enhance employability

④ Creation of jobs in other service sectors to combat absorption of employment loss; labour intensive

Sectors

→ Tourism →

→ Textile

→ Construction Sector

→ Metal-leather, Jute industry

⑤ Employment compensation / assistance

⑥ Agricultural development

Making agricultural a profitable business by using technology - GPS, satellite, processors, barcoding

4

Innovation ecosystem

Remarks

skill and education regarding context

Q3. This Question contain 2 parts and both are compulsory:

- (a) Analyze the recommendations of Bibek Debroy committee. How this would impact the development of Railway infrastructure in India?
- (b) Indian Government recently established the Rail Development Authority. What is the objective of this authority? Will the setting up of the authority will help in tackling the challenges faced by Indian railways? (12.5 Marks)

Recommendations of Bibek Debroy Committee

- ① Improving railway safety
- ② Focussing on core business & out sourcing of other activities (managing Schools etc) to private sector.
- ③ Promotion of R&D, and investment in equipment manufacturing
- ④ Independent authority (Rail development authority) to decide on private investment, to maintain level playing field competition, and decide on cross-subsidization issue

how this will help in railway infrastructure development

- ① reduce excessive political interference: ~~excess~~
~~Subsidisation has made freight uncompetitive~~
~~Independent decision making will improve freight~~
~~sector.~~

Remarks → Transition to commercial accounting

- 2.5
- ② Independent & autonomous institution will inspire confidence of private sector.
 - ③ focus on Corporatism will enhance effectiveness.
 - ④ changes in railway service cadre will bring a dedicated expertise to focus on railway development

(b) Rail Development Authority

Objectives

- ① reduce political interference
- ② cross-subsidisation - rational decision making
- ③ give private sector a level playing field by maintaining competition in railway infrastructure development
- ④ decision making will be based on experts
- ⑤ critical areas: safety, sanitation, cleanliness will get adequate focus

The IRDA will improve investors' confidence to invest in Indian railways

Further actions can be taken to attract FDI and technology transfer (high speed rail)

However success of IRDA will depend on the composition of members, powers and authority to take independent decisions, and enforce it

→ enhancement of non-fare revenue.

Remarks

- Q4. What do you understand by Universal Basic income? What is the estimated fiscal impact of this scheme and assess its feasibility in Indian purview? (12.5 Marks)

- Universal Basic Income (UBI) is an unconditional cash transfer to citizens irrespective of their individual incomes.
 - It is different from kind transfers (PDS, Kerosene, fertiliser), it's an direct transfer of cash to beneficiaries account.
 - It is not targeted, but given to all citizens.
- Objectives
- ① To deal with job loss & unemployment
 - ② Reduce poverty, malnutrition
 - ③ Health outcomes
 - Generate entrepreneurship

Estimated Fiscal Impact of the Scheme

- ① If all the citizens are provided with a cash of Universal basic income estimate amount, it will be around 14% of GDP.

Feasibility in India

- ① UBI if implemented will have adverse impact on fiscal health
- ② Due to political reasons, UBI for introduction will not lead to removal of other programs - PDS, fertiliser subsidy. Hence thus will increase fiscal deficit

Remarks

③ diversion of large amount of money to UBI will ~~inefficiently~~ reduce the Social Sector expenditure - health, education, skill development

④ UBI implementation requires Universal internet access and access to banking networks.

⑤ further UBI can't solve the ~~capacity~~ governance problems of inefficient targeting, inclusion errors, corruption etc. completely

UBI is desirable in future when fundamental problems are addressed:

- (1) government capacity building &
- (2) increased fiscal resource generation through tax compliance, tax-evaporation (7%)
- (3) Social expenditure increase.

education - 6%
health - 3%

good

5

Remarks

Q5. This Question contain 2 parts and both are compulsory:

- Indian service sector, especially IT sector, has been the main anchor of growth and employment in the 21st century. However, in recent past, the Indian IT sector has been in news for lay-offs and not for job-creation. What are the reasons for this? What corrective steps needs to be taken in this regard?
- Indian IT sector has been beneficiary of H1B visa allowances and liberal visa policy of USA in case of highly skilled employees. Examine how Indian IT industry is going to be affected following the strict visa policy under Trump regime.

(12.5 Marks)

①

Indian Service Sector
Contribution to GDP - 58%
Employment generation - 28%

Though Indian service sector contributes 58% to GDP
it's corresponding result in job growth or not
variable. Unlike other countries Brazil (GDP-68%
employment : 58%)

Reasons for Job Lay-offs

- Skill gap
higher education sector in India is facing problem of quality education, and graduates don't possess industrial skills for employment
- Service Sector requires high skills and knowledge
however in India enrolment ratio in higher education sector is one of the lowest
- Lack of Skilling by companies
Companies avoid skill training / Upgradation of skills of employee to reduce cost of production - this

Remarks impacts future growth potential

~~Corrective steps~~

- ① Academic-Industrial linkage
- ② Higher education quality
- ③ Vocational training
- ④ Skill boarding courses

2.5

b)

Reasons

protectionist measures adopted
across the major economies

Remarks

- Q6. In recent there has been a spurt in digitization. Can digitization help in bringing inclusive growth in India? What steps should be taken to realize the goal of inclusive growth in digital economy? (12.5 Marks)

~~Digitization or e-governance is aimed at bringing citizens near to government, and making governance citizen-centric.~~

Role of digitization in bringing Inclusive growth

(1) It can reach to large numbers of citizens in a timely manner.

ex: DBT in scholarship, LPG subsidy

(2) Digital payments apps will make financial transactions easier.

ex: BHIM APP

(3) Bank accounts linked with Aadhar and mobile will solve inclusion issue (Fake accounts) and focus on the needy.

(4) Smart phone can be used to reach people.

However, there are certain issues which hinders inclusive development:

① Digital Divide - World Bank has found that in India, large section of people don't have access to internet.

② Penetration of smart phone & internet is not significant.

Remarks

(3) Digital literacy

People lack digital literacy to operate online financial transactions

(4) Cyber security

Chances of online fraud on financial transaction
deter many to use cashless transaction.

Suggestions to improve the scenario

(1) Digital India & Bharat Broad Band

Network programs should be implemented in mission mode for universal access to Internet

(2) Digital literacy

ex: internet saathi by google can be replicated elsewhere

(3) Cyber security

A basic online ombudsman to deal with online fraud and compensation in case of financial loss

(4) use of USSD - which can function on

basic phones too.

Digital dividend is an important tool to achieve demographic dividend & inclusive development. However it requires following actions to make it effective.

4.5

Remarks

digitization and focus on → agriculture
and → msme
and → self STs

- Q7. RBI has been issuing banking licenses under differentiated bank system Wholesale and Long-Term Finance (WLTB) banks. What is the need of such specialized banks? Discuss the scope and benefits of having WLTB banks. (12.5 Marks)

~~Banks in India are not only critical for economic growth but equally important for social development and infrastructure growth.~~

~~for example Banks in India provide loans for starting a company, starting infrastructure projects, term loans, education loans etc.~~

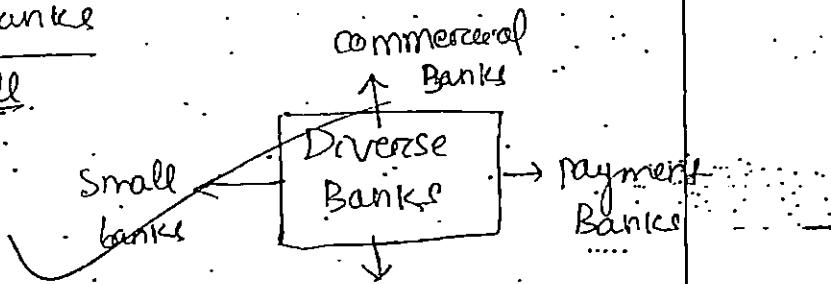

~~However this has led to problems of NPA (stressed assets) as these commercial banks are not suited to lend longterm loans.~~

Need of specialized banks

① Diverse banks will

be able to meet specific needs of different sections.

ex: payment bank - small farmers, artisans.

② The same way WLTB banks can meet the needs of infrastructure (long term) loans.

③ These banks will have specialized management system in place to deal with long-term loans.

Ans

Remarks

Scope of WLTB

- ① it can lead to infrastructure loans
- ② industrial growth loans
- ③ expansion of companies.

Benefits of WLTB

- ① it will help reducing burden on commercial banks especially PSB
- ② investment in infrastructure (Road, Rail, Port) can be stimulated.
- ③ commercial banks can focus on other priority areas: housing loans, loans to SME sector etc.

Differential banking system in India can significantly address the NPA issue and also keep the economic growth & infrastructure growth going.

good (5)

Remarks

- Q8. Government launched Pradhan Mantri Fasal Bima Yojana (PMFBY) to reduce the vulnerability of farmers from natural calamities and ensure sustainable farm income. While highlighting its major provisions, also discuss the performance and challenges it is facing while implementation. (12.5 Marks)

PMFBY: Came to replace earlier insurance programmes (NAIS & MNAIS), which were inadequate in terms of coverage, compensation, timely delivery etc.

Major Provisions

- ① Uniform and affordable premium

ex: 5% for horticulture crops
 ✓ 2% - Rabi 1.5%
 25% - Kharif 2%

- ② Use of technology mandatory

Smart phones, satellites will be used to map the crop yield & timely compensation

- ③ No cap on compensation - full compensation in case of yield loss, crop damage etc

- ④ Natural calamities excluded

Unlike earlier schemes, it includes crop loss due to natural calamities - hailstorm etc

Performance of PMFBY

- ① PMFBY is still in nascent stage of implementation

- ② Still there is inadequate coverage of cropped areas, which is just $\approx 20\%$. tell how

Remarks

(3) Use of technology though mandatory has not taken place significantly.

(4) It is still area-based - if one will get compensation only of the whole village it affected & not for localized crop damage.

Challenges

(1) Lack of awareness

(2) Majority of farmers are still not aware of the insurance program

(3) It doesn't include crop loss due to animals which is a major problem in rural India.

(4) Technologies can be used only when there is large penetration of internet & smartphones.

(5) Local officials have to be trained in the use of new technologies.

(6) PMFBY has ambitious targets, but its success will depend on effective implementation at ground level. Government has to focus on awareness, coverage and strengthening of technological structures.

4

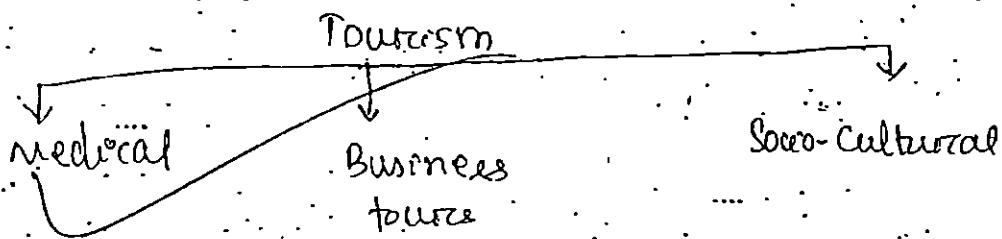

Remarks

→ While loanee farmers get mandatorily enrolled in the scheme, there is not much effort taken to cover non-loanee.

- Q9. Tourism is one of the major economic activity in many advanced nations, though India is catching up in the sector, however, its potential is still untapped. Discuss why India's tourism potential still largely untapped? (12.5 Marks)

WEF report on Tourism has regarded India as one of the most potential destination for tourism in Asia.

Since 2001, the number of tourists in India increased from 4 million to 20-30 million in 2016. & further the earning increased to 40 million. Though it is a large growth, however when compared to other nation US, China, Canada, it is significantly less.

Why potential is untapped

- (1) Visa regulation is complex and cumbersome
- (2) hygienic perception: In tourist places there is lack of cleanliness.
- (3) Lack of basic transportation to tourist places
- (4) lack of water & basic sanitation facilities
- (5) security & safety of women tourists

Remarks

(c) for medical tourism- over-regulation of medical tourism deteriorates many.

What has been done?

- ① Visa procedure simplified
- ② Swachh Bharat Mission
- ③ HRIDAY and PRASAD to improve infrastructure and sanitation facilities
- ④ Tourist circuits - Buddhist, Rural, Tribal, etc.

What more needs to be done

- ① Simplifying business tourist visa
- ② Representing India's tourism, unique places all over the world through various platforms - SAARC, BIMSTEC
- ③ Simplifying medical tourism procedures to attract more tourists
- ④ Strong laws for safety of women

Tourism is said to be a sunrise industry.

It has good potential for employment.

generation & social development. Government need to focus on infrastructure, cleanliness, safety of tourist, to attract more number

& tourists to India.

Remarks

5

good

- Q10. Niti Aayog recently projected a compound annual growth of about 8% of Indian Economy and its transformation by 2031-32. In this light discuss, what policy actions are required for attain and sustaining this level of growth? (12.5 Marks)

~~For attaining and sustaining a high level of growth, India needs multi-dimensional policy reforms.~~

Policy actions

~~economic policies~~

~~social policies~~

~~governance policies~~

~~international agreements~~

Economic policies

- ① ease of doing business

~~W.B. Index, India does good in some factor, but~~

~~lacks low in enforcement of contracts and infrastructure.~~

- ② labour policies - conducive to Farms

- ③ Taxation - simple, transparent and effective taxation. GST is a welcome step

- ④ infrastructure

• electricity, water, road, railway, ports.

~~ex: Programs: Bharatmala, Sagarmala.~~

Social policies

- ① focus on skill development of Youth

- ② education: higher education & imparting industrial

Remarks relevant skills

- (3) Health of employee also linked to higher employment potential
- (4) Focus on gender equality - increasing woman participation in labour force at par with men

Governance

(1) Enforcement of contracts in speedy manner
Judicial reforms to expedite resolution of industrial disputes

(2) eliminating crony capitalism, corruption
 This will also reduce tax evasion, black money
International

Multimodal transport agreements

INFC, BBIN etc. can increase our trade & exports.

(2) Bilateral talks to attract FDI, investments
to make India a success

(3) Multi-dimensional reforms & policy actions are the need of the hour. Further Govt has to integrate Policies (Make in India, Digital India, Skill India) to make economic growth a success

④

→ Strengthening macroeconomic fundamentals

Remarks

→ Fixing banking sector

- Q11. Indian manufacturing products are uncompetitive in global market due to their low quality and standards, especially the exports from MSME sector. Discuss the issues pertaining to low quality of Indian manufacturing. Also discuss the significance of Zero Defect - Zero Effect (ZED) scheme in this regard. What else can be done to improve the quality and standards? (12.5 Marks)

MSME sector in India is significant for employment generation and inclusive development.
In this regard export from MSME is significant way to increase probability & Sustainability of MSME sector.

Issues of quality

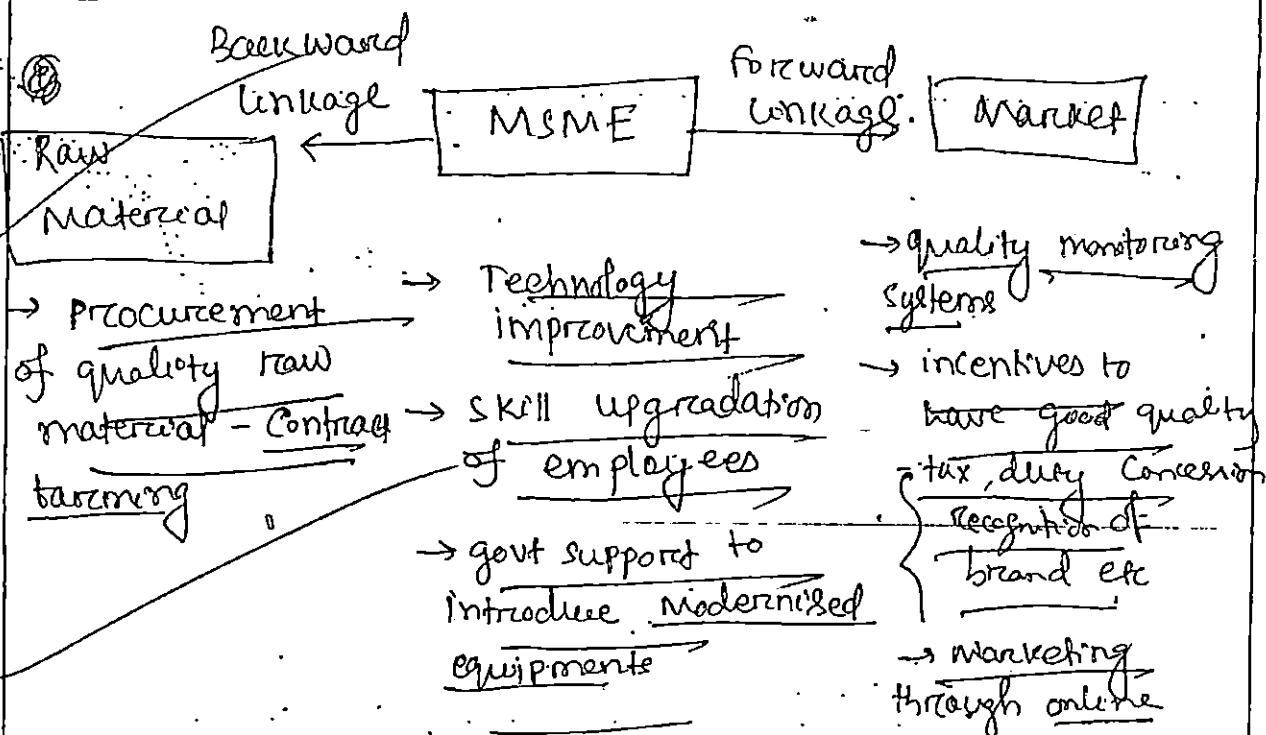

- ① Lack of technological advance affect the quality of products ex: primitive methods to extract Jute
- ② less significant support from Govt. to improve standards of manufacturing
- ③ lack of quality monitoring systems in place
- ④ to reduce cost of production, MSME are using low quality raw material
- ⑤ less of skilled experts to make high quality goods

Significance of ZED scheme

- ① This will ensure that MSME product are of good quality & they don't have large effect on environment too.
- ② This will help MSME to introduce new green technologies.

Remarks

what else can be done ?

Growth of MSME is very essential for

Social development & inclusive development. Hence there is a requirement of Govt focus on improving Capability of MSME sector to produce quality goods which can compete in global markets.

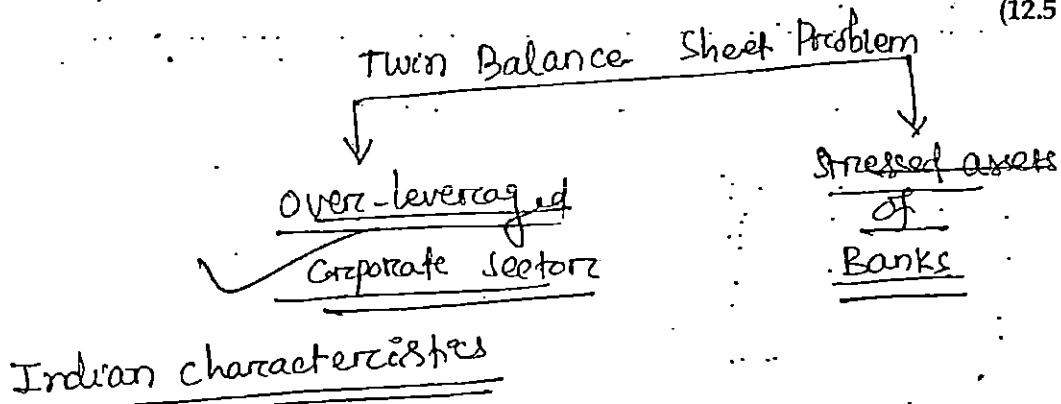

3.5

- Infrastructure on the levels of global quality ecosystem
- National standards co-ordinating agency

Remarks

- Q12. India has been facing twin balance sheet problem with Indian characteristics. What are Indian characteristics and what steps should be taken to find out the solution? How the recently passed ordinance, empowering RBI, is going to tackle the situation?

(12.5 Marks)

- ① Corporate sector is over-leveraged - This leads to lack of growth & expansion.
- ② PSBs are normally not lend to infrastructure / long gestation projects in other countries - But in India, same banks lend for infrastructure & highly risky projects. This mismatch between supply side & demand side have led to NPA problem.
- ③ Crony capitalism, unhealthy nexus between corporate lenders and banking officials have led to NPA growth.
- ④ Lack of 'corporate governance' has reduced profitability of corporate sector.
- ⑤ No strict action against willful defaulters.

Remarks

⑥ Entry - exit policy

~~Though entry is easy after 1991 reforms
exit is not easy due to complex labour
laws, taxational laws~~

RBI empowered

- ① Now RBI can monitor the resolution process of stressed assets
- ② This will expedite resolution of debt and stressed asset problem. Banks can incorporate these bank books
- ③ RBI has been given more power for directing banks to come up with actual, real financial conditions

This will help in early recognition of NPA / stressed asset problem & facilitate timely action to reduce the problem; further the resolution process can be expedited to recover losses.

4

→ Ordinance to enforce expeditious resolution of NPAs and allows the RBI to set up oversight committee for Banks

Remarks

→ Too big to fail kind of attitude by some large corporates

Q13. This Question contain 2 parts; both are compulsory:

- (a) World Bank has been changing its spending pattern from infrastructure to healthcare. How does this change augment the efforts toward achievement of SDG and improved welfare?
- (b) The funding available with the international humanitarian spending agencies, like World Bank, UNCTAD, etc. is far less than optimum. Examine the reasons for such shortfall and suggest how spending deficit can be overcome.

(12.5 Marks)

Remarks

Remarks

Q14. BRICS and AIIB has been two emergent institutions, which can challenge the hegemony of Bretton Woods institutions. However, for that to happen, China requires cooperation of the other developing countries rather than establishing hegemony over the new institutions. Critically analyze.

(12.5 Marks)

BRIC & AIIB certainly have potential to challenge
hegemony of Bretton Wood institutions (IMF & WB)
Further they have potential to carry out
infrastructural development in Asia to make it
a growth hub.

Why China requires co-operation of others to
make BRICS, AIIB to compete with IMF, WB

- (1) In BRICS, each country has equal voting
as well as equal share.
Hence China can't take any unilateral action
in BRICS. It needs approval of other countries.
- (2) In AIIB, though China has big majority
voting share (26%), India has (12%), Russia (9%)
Hence also, it is not possible for unilateral action.
- (3) However at present these institutions don't have
required outreach & capital to supplant / compete
with IMF & WB. IMF & WB has created a large
network in Asia-Pacific, Africa & elsewhere
However AIIB, till now have reached that level of
outreach.

Remarks

Hence to compete with ~~Art & Co.~~ IMF, WB, it has to grow Sustainable in terms of Capital & Outreach to other securities

This requires co-operation of all the Stakeholders & change unilaterally Hegemonic
Can't achieve this.

3.5

→ funding to these institutions should be in equal proportion based on the size of their economy.

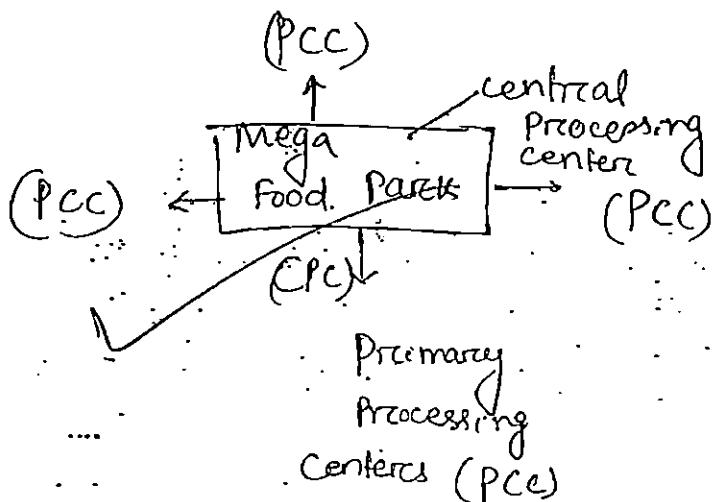

- open
- inclusive
- no-operational attitude

from other developing countries

Remarks ..

- Q15. Despite the fact that Food Processing sector is recognized as sunrise sector and paid ample attention in recent years, the recent statistics suggest that many of Mega food parks, which were announced in the scheme have either not been established or they are on the verge of shutdown. Analyze the factors behind this trend; also suggest what should be done to reverse the trend? (12.5 Marks)

Food processing sector holds huge potential. Rural development and employment generation. Hence govt. came up with program of Mega Food Parks to establish Food processing industries.

Factors for non-establishment & Shut-down of Mega Food Parks (MFP)

- ① Budgetary constraints and lack of private investment has led to non-establishment of proposed parks.
- ② In case of existent MFP, due to the lack of APMC reforms, there is lack of inflow of raw materials for processing.

Remarks

- ③ Lack of integrated infrastructure - road, rail connectivity to processing centers, exports, and transport to markets.
- ④ Lack of cold storage, godowns in rural areas, leading to post-harvest losses, lack of power (24x7)
- ⑤ Skill development - There is lack of skilled labour to be employed.

Suggestions

- ① Providing incentives to attract private sector investment in MFPs
- ② Identify stalled projects & expedite etc establishment
- ③ Promote APMC reforms, corporate contract farming
- ④ Infrastructure - electricity, road connectivity, connectivity to nearby export hubs, cold storage etc

4.5

- Barely 6-7% of total fruits and vegetables in India are processed.
- Food Parks should also be involved in production and marketing.

Remarks

- Q16. Recent Farmers' agitations and suicide once again highlight the discrepancies in inclusive development. In this reference, analyze the factors behind farmer's suicide with a reference to NCRB report. What steps are needed to break the vicious cycle?

(12.5 Marks)

Agriculture in India is important for

inclusive development. Though it only contributes 16% to GDP, but employs more than half the population. Hence improving agricultural growth will also improve the lot of 50% of population leading to inclusiveness.

Factors behind Farmers' suicide

① Crop loss, damage

Vagaries of climate, Pest attack, are major reasons for crop loss and damage. The farmers don't have any other source of livelihood to compensate the loss. This leads to debt-brap.

② Market impediments

In many good harvest years too, farmer's income is volatile. This is because, good harvest leads to low price in market. And MRP coverage is only 6% and covers just majority Rice & wheat. This is insignificant to deal with low prices in market.

③ Access to credit

Small & marginal farmers find it difficult to borrow from banks due to lack of collateral

Remarks

hence they borrow from money-lenders at high cost. Hence Farm loan waivers in case of loss doesn't help these farmers.

- (4) unsustainable use of water, fertiliser, pesticide decreases future crop yield
- (5) post-harvest losses - lack of godowns, cold storage, food processing centers lead to loss of income
ways to break this vicious cycle

① Alternative livelihood

bee-farming, poultry, aqua culture, dairy farming

② ~~to~~ Promote APMC reforms to Fair Price to farmers

③ Promote commodity futures markets to protect farmers from volatile market situation agricultural

④ Wide coverage & awareness of insurance schemes
investment in agriculture - irrigation, efficient water use, soil management etc. to increase sustainability of land

⑤ Providing a compensation to farmers for their contribution to ecological service from agro-ecosystems - done in Brazil & China

4

→ NCRB data regarding farmers suicides

Remarks

2014

5650

2015

8007

42% Increase

- Q17. Micro irrigation can be way out for rainfed agriculture and small land holding in India. In this reference, discuss the advantages associated with micro irrigation, initiatives taken by government and challenges associated with it. (12.5 Marks)

~~Micro-irrigation as a component of precision farming, where focus is on optimization of input~~

~~how micro-irrigation is a way out for rainfed & small land holding~~

- ① ~~Currently half of cropped area is rainfed, leading to uncertainty of production due to climate changes.~~
- ② ~~Drip micro-irrigation can help in turning the production~~

Advantages with Micro-irrigation

- ① water use efficiency

~~Micro irrigation techniques: Drip and Sprinkler~~

~~can help in efficient use of scarce water~~

~~can solve problem such as canary issue~~

- ② sustainability of land use

~~over-use of water leads to problems of salinity & land degradation~~

- ③ efficient use of other I/P

~~drip irrigation can reduce use of fertiliser & pesticides and also reduce growth of weeds~~

- ④ Farming/ cultivation can be done the whole year

Remarks

→ feelings like 'per drop more crop'
 'Har Khet Ko Pani'

→ micro Irrigation funded under
NABARD (initial corpus of 5000), GS SCORE
GS MAINS TEST SERIES 2017

Govt initiatives

① PMKSY - Pradhan Mantri Krishi Sinchayee Yojna.

It has a component "per drop more crop", to promote efficient use of water.

Current budget has 4% of allocation to PMKSY to this component.

This will promote use of drop irrigation & Sprinkler use.

Challenges

① Cost of installation of Micro-irrigation is high.

② Small & marginal farmers will find it difficult to switch to micro-irrigation techniques.

③ Small land holdings is a major problem as it is economically unviable to use these techniques.

④ Use of drop irrigation networks may hinder mechanisation of agriculture and hence big land owners may shy away from using micro-irrigation techniques.

Govt has to incentivise the use of micro-irrigation.

It also has to give support to small & large marginal farmers to use these irrigation methods.

Micro-irrigation if adopted can make it possible

Remarks

for a 'Second Green Revolution' in India.

A5

Q18. The Vulnerability of farmers is not just due to natural vagaries, but also due to defects of public procurement policy. Analyse what should be done to reform the public procurement system? (12.5 Marks)

Today Indian agriculture is facing various problems such as uncertainty of monsoon, frequent drought, crop loss, damage to yield, volatile market situations & the like. Hence not only natural vagaries but also public procurement policy have large impact.

Defects of Public procurement policy

Objectives

① Coverage

Till now the coverage of MSP is just 6r. largely states like Andhra Pradesh, Punjab, Haryana benefit.

1. Fair price to Farmers

2. Food Security of India.

② Lack of awareness among farmers

Recent survey have revealed that only 3% of farmers know about MSP & Public Procurement.

③ Skewed MSP structure

Though MSP is declared for 32 crops, effect only wheat & rice after procured. This has led to unscientific & excessive cultivation of rice & wheat leading to unsustainable land use.

Remarks practices, ground water removal, land degradation.

How to reformat Public procurement

① Shanta Kumar Committee recommendations to be implemented, such as limiting procurement of grains to a certain level

② MSP should be universalised, awareness among farmers has to be generated.

③ Balanced MSP structure

If should incentivise farmers to cultivate crops w.r.t. water, climate, soil requirements.

Ex: Marathawada - Jowar, ragi, baiga, oil, crops

Punjab - Sunflowers, Pulses

Eastern India - Paddy cultivation

④ Coverage of MSP have to be increased from present 60%

Other reforms to supplement the MSP policy

① Irrigation area to be increased

② focus on scientific land use, precision farming

③ agricultural insurance coverage

A efficient and effective procurement policy

With other agricultural reforms (market APME, irrigation, technology use etc) can make Indian agriculture to prosper & facilitate inclusive development.

4.5

Fatty calculations for procurement

Remarks

→ Delay in opening of procurement places

→ exclusion of sharecroppers

Q19. What is precision agriculture? How precision agriculture can help in improving the resource use efficiency in agriculture, with special focus to irrigation? (12.5 Marks)

precision agriculture is efficient and optimal use of agricultural inputs (water, fertiliser, pesticide, herbicide). This has the potential for making agriculture profitable & environmentally sustainable

How it can improve
Resource use efficiency
in agriculture

use of Technology
↑(UAV, GIS, GPS)

-
- ```

graph TD
 Tech[Use of Technology
↑(UAV, GIS, GPS)] --> Precision[Precision Farming]
 Precision -- "Cost reduction & more Profitability" --> Left[]
 Precision -- "Precision in seeding, sowing, harvesting" --> Right[]
 Right --> Optimise[optimisation of inputs: water, fertiliser]

```
- ① Use of GIS, GPS will help to map low productive plots in the same field. And differential input use can be taken.
  - ② Precision Farming focuses on efficient use of water through micro-irrigation, drop & sprinkler uses.
  - ③ These can be integrated with satellite images / data, so that it can provide water to dry areas in the field. This will improve the utilisation of scarce resources such as water & fertiliser.

Remarks

(4) ~~Satellite weather forecasting can also be integrated to use of irrigation.~~

For example, if there is forecast for a drought period, water use can be minimized and proper and suitable crops can be planted.

In case of drought instead of sugarcane, paddy, jowar, oil, pulses can be cultivated

(5) efficient fertiliser & water use will also solve

problems of salinity, and water infiltration can improve. This will help in sustainability of agriculture.

Precision agriculture can transform the base of Indian agriculture. It has huge potential to promote ENTREPRENEURSHIP IN AGRICULTURE by increasing profitability of agriculture.

4.5

→ Precision Agriculture

↓  
site specific crop management

→ sensors in fields measuring the moisture content and temp.

Remarks

→ predictive analytics software uses the data to provide farmers guidance

Q20. How pink revolution can supplement farmer's income? Critically analyse, how the developments of recent years coupled with steep inflation in animal feed prices have impacted the development of sector? (12.5 Marks)

Pink revolution & farmers income

① Indian agriculture is facing problems of frequent droughts, crop loss, damage etc.

This has reduced farmer's income.

② Pink revolution can give an alternative

Source of income to farmers

③ Rise of big middle class & population

increases have led to rise in demand for

protein-rich food: meat, dairy etc.

This will give profits to farmers

④ This also can help meet the nutritional needs of his own family, helping reduce malnutrition & poverty

Recent development: Steep inflation & animal feed price

① Inflation have increased price of meat and there is trend on shifting to other sources of protein: milk, dairy products,

② animal feed price increase have made the rearing of animals economically unviable for farmers

Remarks

other problems

① disease

bird flu recently spread rapidly due to lack of monitoring & animal husbandry services in place. it caused huge loss to

farmers

② Export of Meat

Due to quality & health issues export of meat products from India is not significant

③ Cold storage infrastructure

many farmers don't have access to cold storage leading to loss, damage, quality problems
