Roll No. \_\_\_\_\_

**Public Administration**

Time Allowed: 3 hr.

Max. Marks: 250

**Instructions to Candidate**

- There are EIGHT question divided in Two Sections.
- Candidate has to attempt FIVE questions in all
- Question No. 1 and 5 are compulsory and out of the remaining, three are to be attempted choosing at least one question from each section.
- The number of marks carried by a question/part is indicated against it.
- Answers must be written in the medium authorized in the Admission Certificate which must be stated clearly on the cover of this Question-cum-Answer (QCA) Booklet in the space provided. No marks will be given for answers written in medium other than the authorized one.
- Word limit in questions, wherever specified, should be adhered to.
- Attempts of questions shall be counted in chronological order. Unless struck off, attempt of a question shall be counted even if attempted partly. Any page or portion of the page left blank in the Question-Cum-Answer booklet must be clearly struck off.

## SECTION-A

1. Comment in about 100 words:

(10 × 5 = 50)

- (a) "Public administration that does not work for change and equity, ultimately suppresses the very society it works for."
- (b) "Narrow view of public administration is the practical need of disciplinary identity".
- (c) "The era of orthodoxy sowed the seeds for "New Public Administration".
- (d) "Dichotomy as perceived was after all a rational approach to the investigation of the discipline of public administration".
- (e) "Lack of design is cruel, wasteful and inefficient, at the onset organization is a designing process".

Q1  
a)

According to ~~later~~ Woodrow Wilson public administration is detailed execution of law. Public administration has its aim as welfare of society.

New Public Administration (T Minnowbrook

Conference 1968) stated public administration failed to solve social-economic problems of society because of -

- |                          |                         |
|--------------------------|-------------------------|
| → bureaucratic elitism,  | → value-neutrality      |
| → disciplinary orthodoxy | → impersonal detachment |
| → status quo nature      |                         |

Remarks

4

leiberran bureaucracy with impersonal  
detachment become mechanistic rule-  
 oriented than goal-oriented.

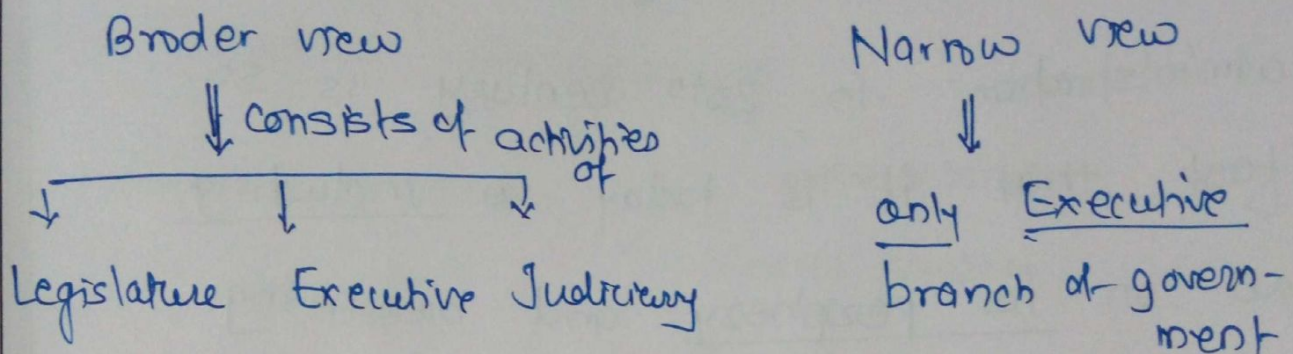

It was aimed for

equity, social-economic goal → secretive,  
development of weaker displacement self-  
 section, aggrandisement,  
 self-seeking

Instrument of change → became institutionalist

Thus the public administration if  
 could not cope with changing need of  
 society and remain value-neutral could  
 not be show equity towards needy  
 and becomes the hurdle in achieving  
 goal of welfare of people.

Public administration as a discipline has Broader view and narrow view.

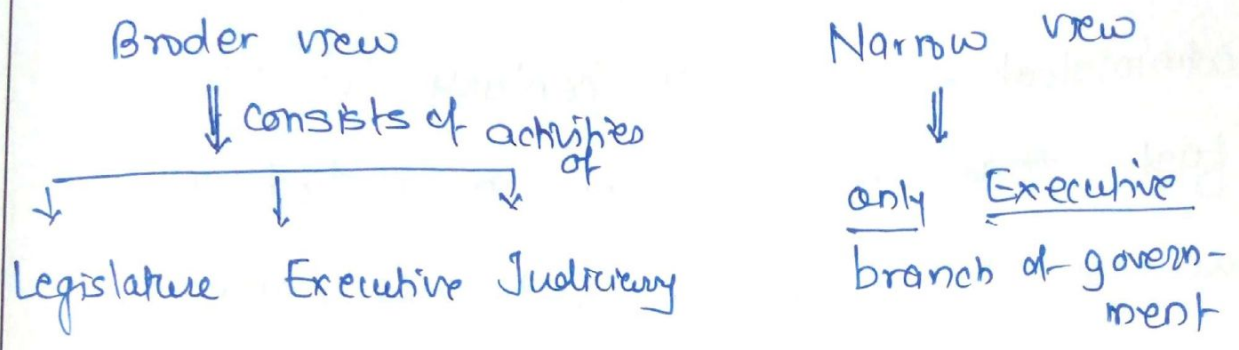

Narrow view supported by : Simon, Gullick  
 Willoughby : even narrower saying only  
administrative activities, thereby calling public  
 administration 4<sup>th</sup> Branch of government.

How narrow scope is more practical  
for discipline's identity?

1) Broad scope keep on expanding and  
 includes law, society, environment, economic  
 aspects.

b) Public administration as a discipline has Broader view and narrow view.

Narrow view supported by : Simon, Gallick  
 Willoughby : even narrower saying only  
administrative activities, thereby calling public  
 administration 4<sup>th</sup> Branch of government.

How narrow scope is more practical  
for discipline's identity?

1) Broad scope keep on expanding and  
 includes law, society, environment, economic  
 aspects.

Remarks

2) This makes limiting the boundary of discipline difficult.

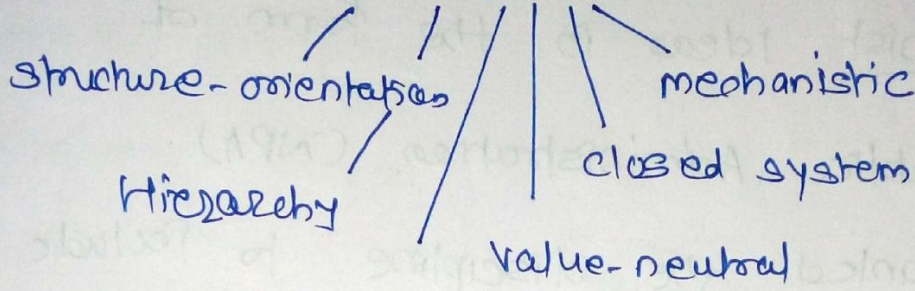

As Waldo said: the growth in public administration in 20th century is so fast that it is today including all on its periphery and becoming all-encompassing.

Thus becoming it difficult to decide what to study in public administration and how to study it.

3) However by considering enlarging, multifarious functions of state, Masher's view feel more practical: The elusive nature of core of discipline provides it strength and public administration is more of interest than discipline.

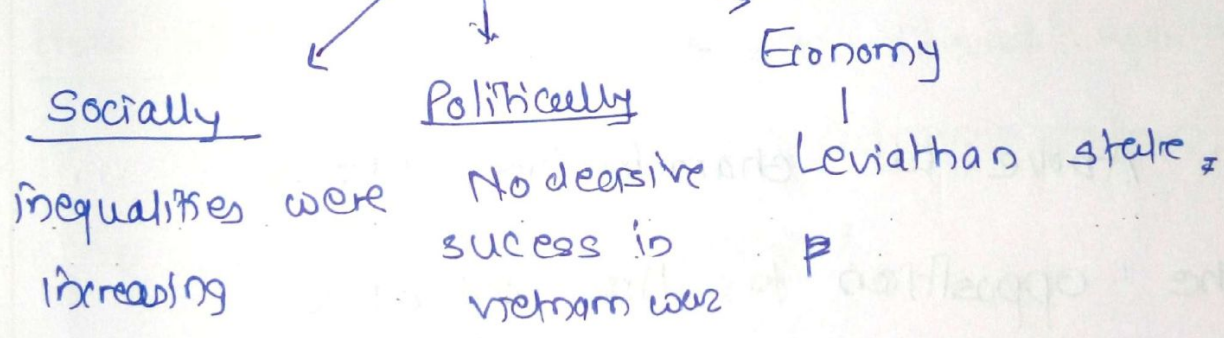

Here orthodoxy refers to traditional view of principles of public administration.

The classical principles ⇒

one Bestway

could not solve the practical problems of society

talentless principles like Hierarchy, neutrality, written communication, impersonal detachment, efficiency, excessive rule-orientation

Remarks

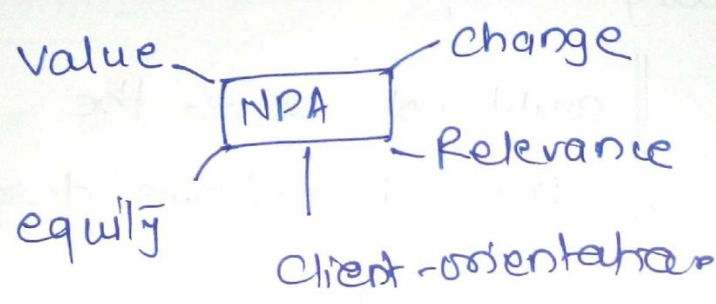

has failed to bring effectiveness and equity.

Thus gave rise to radical and Confrontationist ideas in the form of

New Public Administration. (NPA)

- NPA wanted the discipline to include

Above all characteristics shows the opposition to the orthodox meaning of public administration.

d)

Dichotomy in public administration and political science as first advocated by Woodrow Wilson is base for ascription of public administration as separate discipline.

Dichotomy says

politics

Administration

How dichotomy follows a rational approach in formation of public administration as a separate discipline?

1) policy formation is province of political bosses where as implementation could be efficient if done by technically skilled administrators

Remarks

2) Administration is like a business  
can attain efficiency through scientific  
study of management.

3) With democracies → state functions  
increased and diversified → specialisation  
for implementation needed.

Thus dichotomy proved that  
spoils system in monarchy is no  
more desirable. and want separate  
discipline of administration to be  
carved out of politics to obtain  
efficiency and economy in administration.

e) Gantt and Urwick gave at most importance to the structure of organisation. They consider.

Design -> includes organising institution into order (hierarchy) of functions.

2) Defining the interrelations among them

3) classifying work - division of work

4) Specialisation.

- Without designing the resources would not be allocated to right position.

thereby violating right people to right-

Remarks

place principle and wasting their potential.

- Inefficiency due to mess / confusion created. The skills not sharpened and used properly.

Successful design is base for efficiency, relevance and meaningful implementation.

3. Answer the following questions:

(a) "NPA was neither a revolt, nor a revolution in true sense of the terms." Comment. (200 Words) (20)

(b) "Is NPM really dead?" Identify the context, content and contradictions of NPM movement and the forces, Academic or administrative which have led to the demise of NPM. (300 Words) (30)

Q) New public administration came as a response to inability of existing principles of public administration to solve practical problems in administration.

- It tried to tune public administration studies with practicalities faced in society.

- It suggested -

① Relevance: The society wanted socio-economic development and not just efficiency as envisaged by classical theories. So making administration

Remarks

more relevant was a aim  
 ② Change: Not status quoist but responsive  
 to changing needs

③ Equity: Not value-neutral, fact-based,  
 rule-oriented decisions but to consider  
 poor, socially - & underprivileged

④ value - anti-positivist view. Total fact-based  
 decision lacks empathy, inclusiveness

⑤ Client-orientation: not considering citizens  
 as subjects but as equal stakeholders.

It showed difference in means  
 of achieving goals of administration.

However criticised as -

1) 'How' to bring change, equity,  
 relevance is not defined. ✗

Remarks

2) Old wine in new bottle: As same administrative tools (bureaucracy) was expected to bring changes.

3) It is rebellion in theory, but status quoist in techniques

So considered neither revolt nor revolution in public administration.

However their contribution can not be underestimated as they -

- 1) Expand the scope of discipline
- 2) Pointed out problems of society and formed discipline to find out solutions.

Public choice theory and post NPA developments shows, the questions raised by NPA - made public administration more relevant.

Remarks

b)

New public Management tried to apply principles of private administration in public sector institutions.

New - as earlier principles are changed

public - was related to public sector efficiency

Management - Techniques like Scientific management Theories (Taylor) applied

Context of NPM :-

During 1950s state became leviathan, and public sector enterprises - a white elephant (PSEs)

Remarks

- 2) public money were used for survival of PSEs
- 3) secrecy, inefficiency, red-tapism, status-quoism, hierarchy brought inefficiency.
- 4) In 1970-80s - state-led administration failed completely given way to Reaganomics (USA) and Thatcherism (UK).

### Content of NPM -

- 1) focus on implementation
- 2) Performance evaluation was made objective
- 3) Efficiency
- 4) Competition and cost effectiveness,  
cost cutting
- 5) Privatisation
- 6) More choices to public (Public choice Approach)

emarks

7) It is also known as neo-Right philosophy.

8) Entrepreneur state : act like private

### Contradictions

1) state is for welfare and can't act as profit-oriented private sector

2) has sovereign functions like foreign policy and essential functions - disaster management

3) Citizens cannot be treated as consumer, as many are out of forces of market Example: Tribals, poor, elderly.

4) Roll-back of state not practicable  
always

5) failure of Independent Regulatory  
mechanism

Is NPM dead?

Because of above contradictions it  
is said that

Principles of 'specialised agencies',  
regulatory mechanisms failed

Example: In UK passport issuing de  
given to multiple specialised agencies  
which took more time for dispatch  
than earlier system.

- Problem of Coordination among various  
regulatory authorities failed

Remarks

4) Roll-back of state not practicable  
always

5) failure of Independent Regulatory  
mechanism

Is NPM dead?

Because of above contradictions it  
is said that

Principles of 'specialised agencies',  
regulatory mechanisms failed

Example: In UK passport issuing de  
given to multiple specialised agencies  
which took more time for dispatch  
than earlier system.

- Problem of Coordination among various  
regulatory authorities failed

Remarks

Example: - 2008 economic crisis of USA is due to non-coordination of regulatory frameworks

Academic / Administrative frameworks that lead to demise of NPM

- 1) Independent regulatory authorities proliferated in number without integrated approach.
- 2) Public sector enterprises has service obligations, dual control (political and market) so can't act as private.

~~It~~ However we can't say NPM is dead but continued in form of digital era and e-governance.

## SECTION-B

5. Comment in about 100 words:

(10 × 5 = 50)

- (a) "Scientific management was a primitive tool of industrial polyarchy".
- (b) "Human relations movement was social-psychological approach towards industrial organizations".
- (c) "Before we criticize Weber for his lack of idea of ecology, we must understand the ecology of his ideas".
- (d) "Subject matter view is the appropriate response to the theoretical ambivalence in public administration".
- (e) "Behavioralism was neo positivist, neo bureaucratic approach disguised as humanism".

g) Scientific Management principles of Taylor were brought to bring mental Revolution for benefit of both employees and employer.

Why it can be called primitive tool of industrial polyarchy?

Industrial polyarchy - rule/dominance of few mainly employees.

- One best way, stop-watches, time study

Remarks

39  
work study improve productivity and  
helped earn more profits.

- Though it helped employees earn  
more wages, turned disadvantageous  
like - work becoming monotonous, boring  
physically demanding

- mechanistic work

- single motivation - monetary

- no initiative or innovation

- no/reduced role of trade unions

so no bargaining power.

- experience, loyalty not considered  
in piece-rate system

However humanistic side of scientific  
theory are - monetary benefits with increased  
productivity and less working hours can't be neglected

Remarks

b) Human Relation approach of

Elton Mayo considered

organisation - social system

Employees - dynamic human beings.

He considered

- informal groups within formal organisations for improving efficiency.
- His experiences in (Bank-wiring experiment)

Hawthorn-Experiment shows that

socio-psychological factors are more

important in improving productivity

- Traditional factors like

a) working conditions

b) wages / incentives

are ~~is~~ irrelevant in improving performance

The more influential factors  
being

① Togetherness / belongingness, interpersonal  
relations in informal organisation.

② Recognition to group of employees

③ Taking their views in consideration

(Mass interview experiment)

Thus he proved socio-psychological  
factors are more influential than  
monetary factors as considered  
by classical theorist.

9 Weber gives bureaucratic theory by considering German socio-political conditions and called it as ideal type of model.

Why is he criticised?

- 1) consider organisation as closed system
- 2) Thought of only Western countries (Germany in particular) and still claims universality of principle
- 3) Empirically not valid theory as no experiment conducted.

What makes his ideas ecological?

1) Considered socio-economic conditions

of society while giving 3 types  
of authorities

a) Traditional authority - for patriarchal,  
patrimonial society

b) Charismatic authority - for authoritative  
and leader with supernatural influential  
capacity

c) Legal-rational - where law and rules are  
abide by.

This proves he consider ecology  
of country and organisations while  
designing his theory.

d)

Subject matter view consider all units / administrations are not same and deal with different purpose.

'What' of each administration is different.

Example: Defence department and health department have difference in operation.

- So what the organisations deals with must decide its principles and theories applied to it

- In this respect Colembrewski explained laws and focus of public adminis -

Remarks

strategies.

- Focus being what public administration deals with that is policy implementation areas
- Locus - where it belongs to or finds its place in. It finds its locus in political science

Subject matter view thus focus on functions of agency rather than inclusion of legislative, executive, judicial contributions to its implementation

Behaviouralism focus on socio-  
psychological side of organisation

However

Simon's emphasis on

1) fact orientation for rational decision making

2) bounded rationality as complete rational decision is not possible due to ~~lack~~ lack of information, processing techniques or skill gives justification for non-rational decision.

3) Though ~~trous~~ considered informal organisation, emphasised value - neutrality which seems contradictory.

NeoBureaucratic - As managers were asked to increase zone of indifference (Bernard) and zone of acceptance (Simon) for improving acceptance from employees.

- This is to increase the profits of employees.

However their emphasis on employees' acceptance, satisfaction for contribution and efficiency shows their behavioural nature more than mechanistic theorists.

Remarks

6. Answer the following questions:

- (a) Post weberian developments were either endorsements or refutations of Weber. Comment. (250 Words) (25)
- (b) "If governance means interactional plurality in terms of collective societal problem solving, where do we place the phenomenon of gender as constituent of governance". Explain. (250 Words) (25)

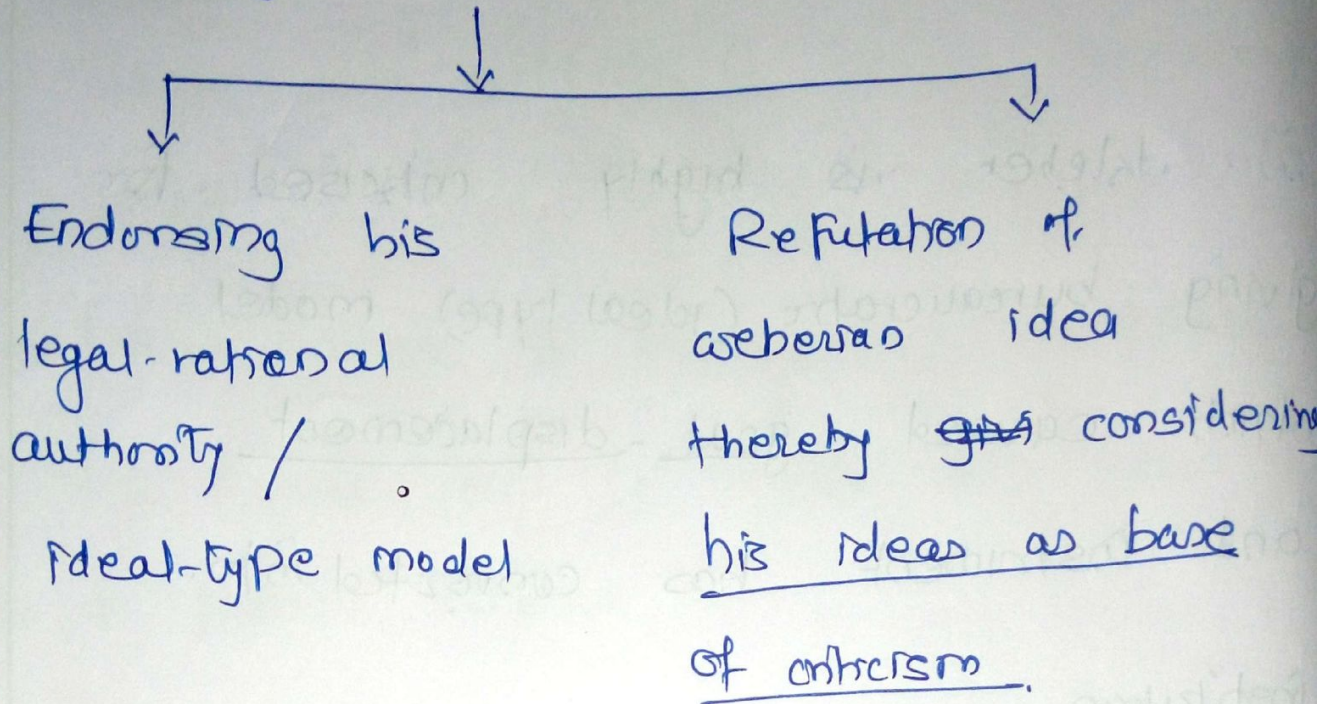

Q) Weber is highly criticised for giving bureaucratic (ideal type) model which caused goal-displacement and instrument has converted into institutions.

Q) Weber himself says: once established bureaucracy is most difficult to be dismantled.

Q) Also possesses vices like - self-aggrandisement, self-seeking, budget maximiser

Post weberian developments see

two groups

Though bureaucracy has limitations like - red-tapism, secrecy, inefficiency, rule-orientation, impersonal detachment making them more mechanistic other alternatives like  
⇒ Military rule - as in some

Remarks

Arabi African countries

b) spoil system - precursor of democratic state and bureaucracy

These don't suit modern democracies

Post weberian tried to bring

- value, relevance, equity - New Public management
- More competition, more choices in economic, social, political spheres - Public choice theory
- Modify Modifying public sector enterprises with Public, private partnership and New public management could be seen just additions to Weber's concept

Weber's bureaucratic model can

be improved with

1) more transparency

- RTI,  
citizen charters

2) More accountability,  
responsiveness.

It's cleaner and transparent.

bureaucracy ~~not~~ not any other model

Suits modern industrialised and

democratic world.

Remarks

2) Governance - is designing the policy and implementation of them.

- Governance is ability to use the socio-economic resources of a country to achieve welfare for all.

- In contemporary situations, multiple institutions involved and ecological approach to governance followed

Example

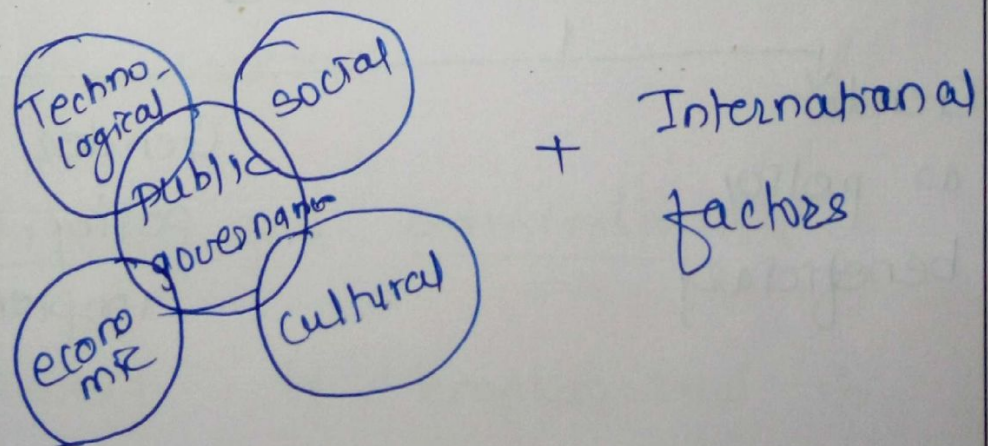

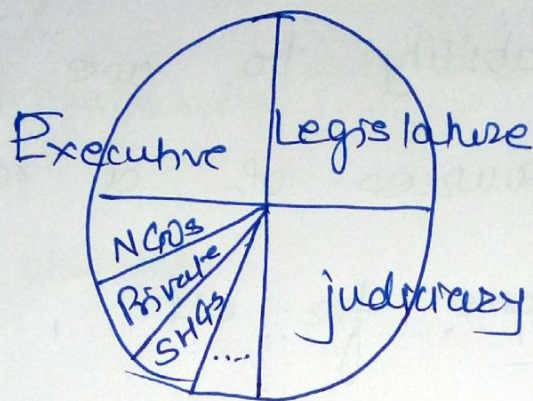

Fig : factors influencing governance

Governance has become  
institutionally also plural

factors providing governance,

It's not just government ↓ which  
 provides services.

Gender in governance

Gender  
 as policy  
 beneficiary

Gender as  
 policy  
 implementer

Gender  $\Rightarrow$  due to patriarchal dominance, in policy implementation as well as benefits are dominated by men.

Gender empowerment also reflected in governance in the form of

1) gender budgeting

2) Schemes like : Beti Bacho, Beti Padhao

3) UN Women - wing dedicated for women empowerment.

4) The political and administrative empowerment is emphasised in democracy.

Remarks

Gender sensitivity - though increasing  
much need to be done to bring  
gender parity in governance.

7. Answer the following questions:

- (a) "The abolition of bureaucracy is only possible by the general interest actually become real". (Karl Marx) (250 Words) (25)
- (b) "Follet's idealism is showing". In the context of the statement discuss her concept of functional authority, coordination and integration. (250 Words) (25)

Q) Karl Marx was bitter critique of bureaucracy.

Thinks

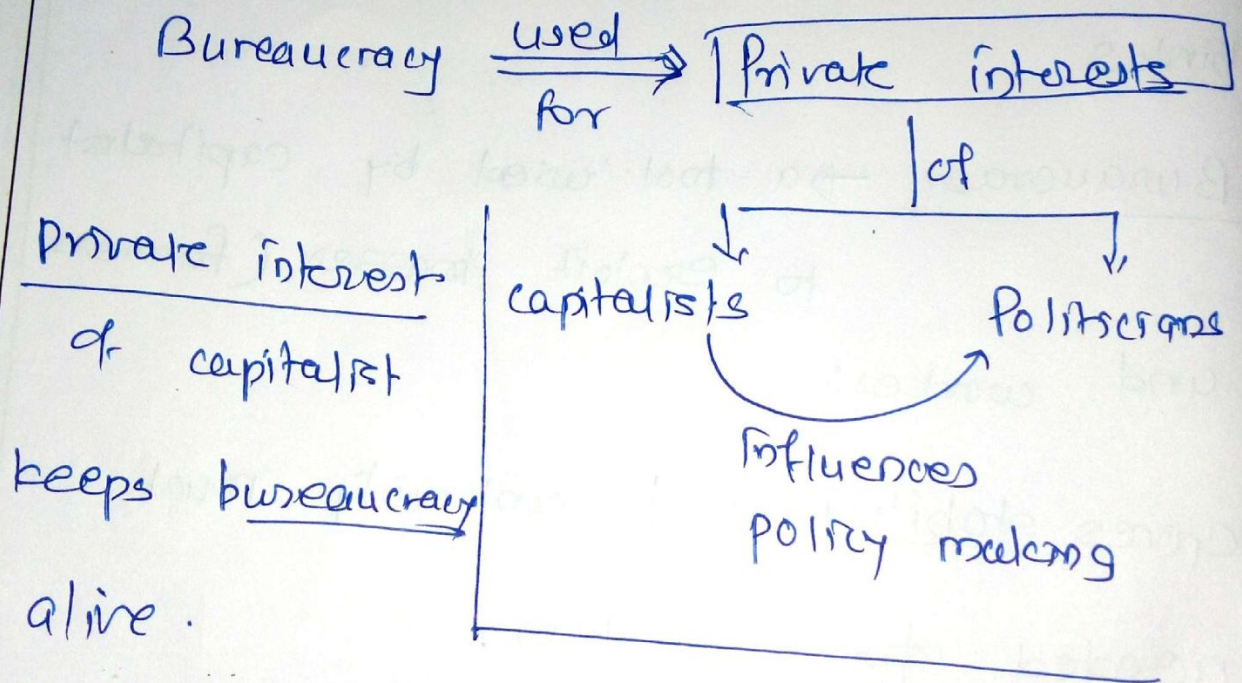

# Bureaucracy → a tool used by capitalist to exploit masses (farmers and workers)

⇒ gives stability and continuity much needed for capitalism

Example: Law and order, land acquisition, development of infrastructure benefits capitalists

(3) Bureaucracy use tool of seniorship to perpetuate interest of few in their political ambitions

means

If bureaucracy (a instrument) is to be dismantled the very

purpose for its existence must be eliminated

- Bureaucracy exists for perpetuating private interest and not general interest.

- General interest  $\Rightarrow$  interest of all / masses

Till the private interest exist the tool to protect it also exists

So it is mandatory to end

private interest, private holdings

and profits of capitalists, thus

automatically would end bureaucracy

However it is harsh statement

in today's democratic world.

As welfare state

multifarious functions

specialisation

provided by bureaucracy.

follet is criticised for her idealistic and non-pragmatic ideas which could be seen in her ideas

1) functional authority

a) Authority is not dominance  
 ↓  
 or acceptance  
 ↳ behaviourists  
 ↳ classists

↳ but authority is situational - stays with function. → functional authority

In a situation function gives order and accepted by others without resistance

↳ one who specialised in certain functions is authorised to give

order.

Thus she propagated power with

3) & not power over.

2) Coordination and Integration :-

She says

1) Conflicts are inevitable

2) conflicts could be constructive

3 ways to resolve conflict

① domination - by superior

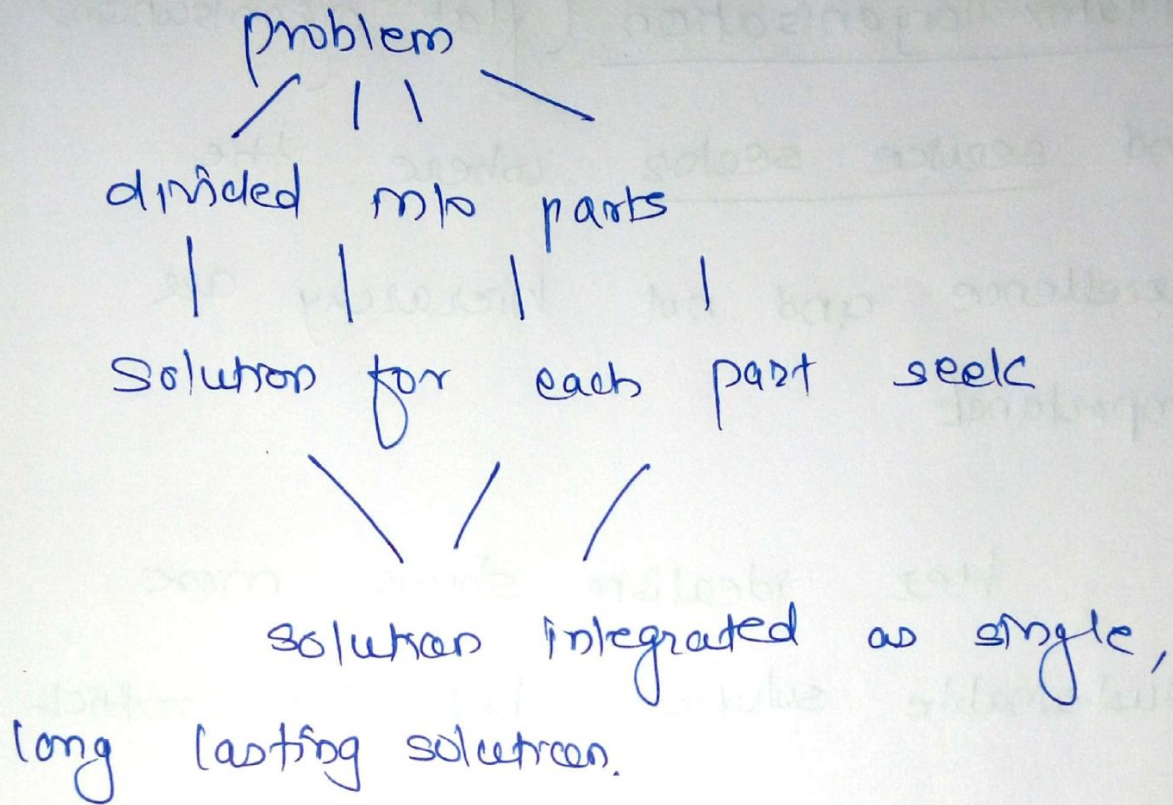

② Compromise - by both parties, but

just prolong result of issue, slow  
speed of conflict

Remarks

③ Integration - w/m - w/m for both parts

Here the

Coordination - must be started from very beginning as it is very difficult to attain it.

This seem very idealistic however  
her ideas found implemented in  
Matrix organisation (flat organisation)  
and service sectors where the  
excellence and not hierarchy are  
important.

Her idealism shows more  
sustainable solutions beho for conflict  
like Whitley councils in UK.
